CALL FOR PAPERS

Nanjing, China, September 22-24, 2017

The 2017 International Conference on Life System Modeling and Simulation (LSMS2017) and 2017 International Conference on Intelligent Computing for Sustainable Energy and Environment (ICSEE2017) aim to bring together researchers and practitioners in the field of life system modeling and simulation as well as intelligent computing theory and methodology with applications to sustainable energy and environment across the world. These events are built upon the success of previous LSMS conferences held in Shanghai and Wuxi in 2004, 2007, 2010 and 2014, and ICSEE conferences held in Shanghai and Wuxi in 2010 and 2014 respectively, and are based on large-scale UK-China collaboration projects on sustainable energy. At LSMS2017 and ICSEE2017, technical exchanges within the research community will take in the form of keynote speeches, panel discussions, special sessions, as well as oral and poster presentations. Participants will be treated to a series of social functions, receptions and networking sessions, which will serve to establish new connections, foster friendships, and forge collaborations. The conference in particular welcomes proposals of special sessions related to the key themes of the conferences and the workshops.

PAPER SUBMISSION

Prospective authors are invited to submit full-length papers before the submission deadline through the online submission system. Further, proposals for special sessions within the technical scopes of the conference are mostly welcomed. Papers submitted for special sessions will be peer-reviewed with the same criteria as the normal contributed papers. A special session proposal should include the session title, a brief description, names, contact details and bio-sketch of the organizers.

Accepted papers will be published in the Springer Communications in Computer and Information Science (CCIS) proceedings (EI Compendex), which is under review. Some high-quality papers will be recommended for possible publication in SCI indexed international journals after expansion and further review, such as *Neurocomputing*, *Transactions of the Institute of Measurement and Control*, *Cognitive Computation*, etc.

IMPORTANT DATES
